The Indiana State Fair holds exhibitors of the various species of animals being exhibited to the highest standards in wellness, care and ethics of exhibition. The AWAC is responsible for ensuring the most up to date standards as well as to be a source for the public to seek answers to their questions relating to the health and safety of the animals involved in the Indiana State Fair.

Biosecurity

The Indiana State Fair Biosecurity Plan was developed to prevent the outbreak of diseases carried by both animals and humans that spread pathogens that can be transmitted to and from farm animals, as well as through the food supply. Many diseases and pathogens can be prevented through maintaining the cleanliness of facilities and encouraging good hygiene. The Biosecurity Plan will be enforced during the Indiana State Fair and all exhibitors are required to comply with it.

The Indiana State Fair is committed to providing opportunities for all 4-H participants to show their animals as part of the State Fair. 9. Print titles should be written on the top on the back of the print.
10. Name, previous awards, seals, ribbons or any other identification may not appear on the front of the entry. No prints in frames, under glass, plastic covers or shrink wrap will be accepted. No hangers, rough, raised or sticky substance on the back or the front of the prints.
11. Prints previously displayed at the Indiana State Fair may not be entered again.
12. No two (2) prints shall be of the same subject matter unless treatment is such as to produce two entirely different photos.
13. The official judges will assign points to each entry. The highest score will determine awards and premiums.
14. The Indiana Arts Department Superintendent and State Fair Officials reserve the right to disqualify prints deemed to be in poor taste, or to remove after hung, if public complaints arise.
15. All possible care will be taken to safeguard the exhibits, but no responsibility will be assumed by the Indiana State Fair for any loss or damage in transit or while in our possession.

16. **The original exposure and image must be that of the exhibitor. Copies of photographs or photographs taken during an instructional class will not be allowed.**
17. **NEW** It is the photographer's responsibility and not the obligation of the Indiana State Fair nor IPPG to secure a release of any individual in a photograph. Likewise, permission in the form of a written release is required for any photograph on private **property including Rail Road property.**
18. **NEW** All photographic entries must be created by the entrant. Photographs created in any part by the use of Artificial Intelligence (i.e., not by the use of a camera) will be automatically disqualified. Artificial Intelligence is commonly abbreviated as "AI."

Judging:

A 3-person panel composed of professional photographers will judge all photographs in each classification. The judges will have the authority to decide any question not specifically covered by these terms and conditions and their decision will be final. Judges also have the right to reclassify any print.

1. **Impact** is the sense one gets upon viewing an image for the first time. Compelling images evoke laughter, sadness, anger, pride, wonder or another intense emotion. There can be impact in any of these 12 elements.
2. **Technical excellence** is the print quality of the image itself as it is presented for viewing. Retouching, manipulation, sharpness, exposure, printing, mounting, and correct color are some items that speak to the qualities of the physical print.
3. **Creativity** is the original, fresh, and external expression of the imagination of the maker by using the medium to convey an idea, message or thought.
4. **Style** is defined in a number of ways as it applies to a creative image. It might be defined by a specific genre or simply be recognizable as the characteristics of how a specific artist applies light to a subject. It can impact an image in a positive manner when the subject matter and the style are appropriate for each other, or it can have a negative effect when they are at odds.
5. **Composition** is important to the design of an image, bringing all of the visual elements together in concert to express the purpose of the image. Proper composition holds the viewer in the image and prompts the viewer to look where the creator intends. Effective composition can be pleasing or disturbing, depending on the intent of the image maker.
6. **Presentation** affects an image by giving it a finished look. The mats and borders used, either physical or digital, should support and enhance the image, not distract from it.
7. **Color Balance** supplies harmony to an image. An image in which the tones work together, effectively supporting the image, can enhance its emotional appeal. Color balance is not always harmonious and can be used to evoke diverse feelings for effect.
8. **Center of Interest** is the point or points on the image where the maker wants the viewer to stop as they view the image. There can be primary and secondary centers of interest. Occasionally there will be no specific center of interest, when the entire scene collectively serves as the center of interest.
9. **Lighting** —the use and control of light—refers to how dimension, shape and roundness are defined in an image. Whether the light applied to an image is manmade or natural, proper use of it should enhance an image.
10. **Subject Matter** should always be appropriate to the story being told in an image.
11. **Technique** is the approach used to create the image. Printing, lighting, posing, capture, presentation media, and more are part of the technique applied to an image.
12. **Story Telling** refers to the image's ability to evoke imagination. One beautiful thing about art is that each viewer might collect his own message or read her own story in an image.
